

THE COMPANY

Founded in 1992 with the goal of providing cashless acceptance to the traditionally cash-driven vending market, Cantaloupe, Inc. forged what has become today's retail movement. What began as a solution focused on unlocking the potential of cashless payments in vending, has evolved into the first all-in-one platform to power retail operations, from hardware to software for all kinds of brands.

Today, the retail experience is constantly expanding to new verticals and enables merchants to work in new ways. We are keeping our customers ahead of the adoption curve – meeting them on location, partnering with them to grow in new markets, and helping them reach new customers.

Cantaloupe is constantly advancing the way companies across the globe manage, optimize, and automate the critical decisions made on a daily basis. We are committed to helping businesses grow smarter, better, and faster than ever before. Our mission is to create, innovate, and build products that subtly change the way we live.

Company Overview

WHAT OUR CUSTOMERS ARE SAYING

"Before we had [Cantaloupe] there was a lot of guesswork involved. Seed software has made all components of our business function more efficiently, from accounting, delivery, routing - all those aspects have been made easier."

Accent Food Service

"[Cantaloupe] has opened the door to the future of amusement and vending industries, and it's making that future happen today."

Sneaker Syndicate

"The value of our partnership is that it's truly a partnership where both parties work collaboratively to find solutions. Cantaloupe has a really good understanding of what our issues are and what we face in the industry."

Continental Services
